POLICIES, PROCEDURES, AND WARRANTY

MANUAL OVERVIEW:

Your new "user-friendly" parts manual will help you place orders for wheelchair parts. Use this manual as a tool to easily locate and order the correct parts for your customers.

The parts manual is categorized by frame types, component types and accessories. Refer to the table of contents to locate the section for the items you need. For example, reference the frame sections in the beginning of the parts manual for the frame parts. Reference the component sections for others types of parts (i.e. for parts relating to backrests, refer to the section labeled "Backrests").

Each item is shown in an "exploded view" illustration. Below each drawing is a legend that has an item number, part number, product description, and quantity used per assembly. Some parts may be included in an assembly but may not be available for purchase separately. Such parts will be included in the drawing but will not be called out individually in the legend below the drawing. Prices for parts are located in the Quickie Parts Pricing Guide, and are in numerical order by part number.
